

Remarks

This is in reply to the official action of October 24, 2008.

A further "third substitute specification" is provided in clean and marked up versions, addressing all objections raised by the Examiner and which incorporates the Examiner's suggestions. This "second substitute specification" replaces the one offered in the last response but was not entered by the Examiner.

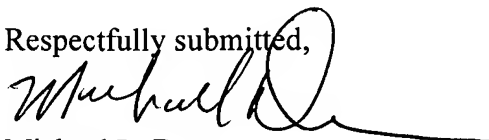

All objections to the specification and claims raised by the Examiner have been addressed by amendment.

Support is provided for the claim language pointed out by the Examiner by amendment to the "Brief Summary of the Invention" by incorporating the limitations set out in the claims. No new matter has been added.

The indication by the Examiner that the claims contain allowable subject matter is noted with appreciation.

All claims are now in condition for allowance, which action is courteously requested.

Respectfully submitted,

Michael L. Dunn
